

Public News Droid

Abstract : Public News Droid is an Advanced and Informative System helping the users to know the news, articles or any interesting things happening around their Locality. This System helps the local public to keep themselves up to date about the happenings around their vicinity or locality or in their City. There are 2 apps for this system to work; one for the admin and another for the user. The user is allowed to view the news only of his city while user can add news related to any city. Admin will monitor if any abuse or irrelevant or fake news added by any users and will take some action. The Front end used is Reactjs while backend as Nodejs. The user has to register into the system to use this app and can update his details as well.
