# E-Ration Shop

**Introduction :**

Public Distribution System (PDS) is an Indian food security system. It is established by the Government of India under Ministry of Consumer Affairs, Food, and Public Distribution and managed jointly with state governments in India. The traditional PDS is used to distribute grocery items to India's poor who are valid ration card holders. The validity and the allocation of the ration cards is monitored by the state governments. A ration card holder should be given 35 kg of food grain as per the norms of PDS.However, there are concerns about the efficiency of the distribution process. In order to make it efficient and improve the current system of PDS we are implementing e-Ration Shop. Here we are going to make a website for shopping purpose. Using this website ration card holder can order his/her grocery items from the FPS online. The main reason for using this website is making this process computerized and to remove the drawbacks of the present way of issuing products based on ration card. The main drawback in the current system is that the PDS has been criticized for its urban bias and its failure to serve the poorer sections of the population effectively. Also many retail shopkeepers have large number of bogus cards to sell food grains in the open market. Many FPS dealers resort to malpractice since they acquire less. Salary So, by this project we are solving this problem too . Most of the times Users do not get their rightful entitlement in terms of quantity. What's meant for them or the farm produce procured by the FPS's is diverted to the open market. So in order to avoid all these drawbacks we are going to use the e-Ration Shop which will help us to avoid the corruption in PDS if not eradicate it.
